

Digital object data collection in highest precision

**Virtual
Digitizing**

VirtualDigitizing

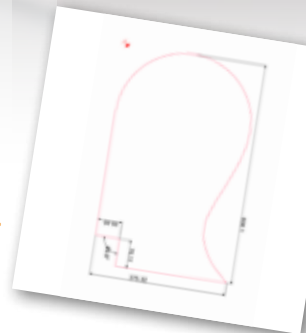

IQ Digital object data collection
in highest precision

Your advantages with VirtualDigitizing

- no high investment for large and expensive digitizing tables, which also needs to be maintained
- independency on template size
- from your template to a finished DXF contour in a few minutes
- automatic contour detection
- marks for hole drilling and definition
- automatic spline approximation – direct transition of data to CNC controlled machinery
- no additional work steps needed

what you need:

- digital camera (needs to be one-time calibrated)
- license of VirtualDigitizing
- reference size
